

Microscopy.nl is the web portal & gateway to the Dutch microscopy landscape combining the efforts of:
NEMI – NL EM Infrastructure; **NL-BI** – NL BioImaging Advanced Microscopy; **NVvM** - The Dutch Society for Microscopy

'THE WORLDS BEST EM'

Electron Microscopy Utrecht has installed the currently most advanced EM of its kind. It enables resolutions up to individual atoms. The Spectra300 microscope serves as a facility within NEMI.

NL-BIOIMAGING BRIDGE FUNDING II

An NWO grant to further develop standardized data management and data analysis tools has been awarded to NL-BI. This will further allow creating national FAIR standards and AI_driven data-analysis scripts. The initiative is executed by the AmsterdamUMC, Leiden University, Leiden UMC, Maastricht University and UMC Groningen.
